PRODUCT: MULTI INSECT TRIGGER WITH ACARICIDAL ACTION 400ml		Page - 1 - of 2	

1. Product category	Liquid insecticide multi insect		
2. Article Bill of materials	00253/2		
3. Article Sale	00253/2		
4. Distributor	Bergen S.r.l.		
5. Characteristics	QUICK KILL has an insecticidal action with a broad spectrum of action and a marked effect residual. It is effective against pests insecticides, both flying and creeping, in the home, hotels, schools, shops, hospitals, housing, warehouses, as well as in outdoor areas such as campsites and holiday resorts. QUICK KILL should be sprayed as it is on the walls, floors and other surfaces of the environments to be disinfected, insisting particularly in the treatment of angles, cracks, gaps, pipes and all those points that can be sources of infestation or habitual paths of insects. The acaricidal insecticide remains active for a period of several weeks depending on conditions of use: quantity, exposure to light, type of surface treated.		
6. Mode of use	Shake well before use. Dust mites find in homes ideal conditions for living and breeding in each dust deposit, where there are generally small amounts of sand and soil, synthetic fibres and animal debris from the skin peeling of humans and domestic animals. QUICK KILL should be sprayed as it is on all those surfaces that can be a source of infestation. Spray the product with the appropriate dispenser on the surface to be treated (mattresses, blankets, bedspreads, pillows, carpets), from a distance of 30/40 cm with rapid and continuous dispensing: 15 sec. are enough to treat 1 sqm of surface. Check the resistance of the fabric from treat in a hidden corner. Since even dead mites can be responsible for allergic phenomena, after the treatment should be removed through washing machine or through a suitable vacuum cleaner. Spray at a distance of 30-40 cm from the surface to be treated. Application: 100 ml/ sqm. - For treatments against crawling insects: spray the product at the thresholds, door and window jambs, balconies, window sills, baseboards, corners and in cracks, behind furniture and appliances, behind sanitary ware, etc. for bands of 10 cm depth by applying 100 ml of product every 10 m linear.		
7. Formulation	Water, Emulsifier, Solvent, Permethrin 25/75: cis-trans 0,40g su 100g		
8. Analytics data	8.1 Aspect	Clear liquid	
	8.2 Perfume	Compliant with the standard	
9. Packaging	Bottle 400ml	Plastic, white with trigger actuator. EAN 8007675737479
