4. Distributor	4.1	BERGEN s.r.l. 37060 Castel D’Azzano (VR)	
5. Description	5.1	The product Fulmine Liquid recharge is effective because it repels common mosquitoes (Culex Pipiens), tiger mosquitoes (Aedes albopictus) and other small insects from a normal-sized room for 45 nights with an 8-10 hour electroeminator operation per night. The use is practical because it does not need to touch the insecticide directly with your hands. The product is equipped with a wick strongly anchored to the bottle and a safety cap that prevents direct access to the liquid, limiting and regulating its dispersion in the environment through the surface of the wick itself.	
6. Mode of use	6.1	Screw the bottle in the appropriate seat obtained in the electroeminator. Insert the electric emitter into a socket; at the end of the period of use, disconnect the appliance from the socket. One bottle is enough for a normal sized room; if used 8 hours per night its action will rid you of common mosquitoes (Culex Pipiens), tiger mosquito (Aedes albopictus) and other small insects from a normal sized room for 45 nights.
