PRODUCT: GEX ROLL ON AFTER-BITE		Page - 1 - of 2	

1. Product category	Cosmetic after-bite	
2. Article bill of materials	00133/1	
3. Article sale	00133/1	
4. Distributor	Bergen S.r.l.	
5. Description	This afterbite is a preparation based on extracts and components of plant origin that, applied promptly on the offended skin, gives relief after mosquito bites, flies, wasps, horseflies. It can also be used in contact with nettles, jellyfish and other stinging agents. Such derivatives of plant origin of chamomile, aloe, mallow and calendula are responsible for the soothing action. The formulation is specially designed to facilitate application on even the most delicate skins, whose tolerability has been demonstrated in specific laboratory tests. Its calming action gives relief and. It does not contain ammonia. The excellent smoothness is ensured by its components that are designed to give excellent applicability on the skin, without leaving residues.	
6. Mode of use	Lightly massage the affected area, trying to avoid the extension of that skin area. If necessary repeat the operation after 10-15 min.
