PRODUCT: PLATES X 30 pz FLASH		Page 1 of 2	

1. Product class	30 insecticidal plates		
2. Article bill of materials	00411		
3. Article sale	00411		
4. Producer	BERGEN s.r.l. 37060 Castel D'Azzano (VR)		
5. Distributor	BERGEN s.r.l. 37060 Castel D'Azzano (VR)		
6. Description	FLASH PLATELETS BG01 are effective against the common mosquito (Culex pipiens), the tiger mosquito (Aedes albopictus) and other tropical mosquitoes, potential vectors of the zika virus, yellow fever and dengue. Its effectiveness is guaranteed in rooms of normal size (30 m3) for about 8 hours. For larger rooms use more electroemanators.		
7. Mode of use	Activate the electroemanator from 1/2 to 1 hour before entering the room, aerate and keep the windows open for as long as the appliance remains in operation. Insert an insecticidal tag into the electroemanator. - If the appliance is without a switch, plug the emitter into a power outlet; at the end of the period of use, disconnect the appliance from the mains. The replacement of the exhausted plate must take place with the electroemanator disconnected from the socket. - If the apparatus is equipped with a switch, press it to activate it. The lighting of the bright LED indicates that the appliance is live and running. To switch off the appliance, simply switch the switch again without removing the appliance from the power outlet. The replacement of the exhausted plate must be done with the electric emitter disconnected from the socket or with the switch off. An insecticidal plate lasts about 8 hours. At the end the plate will have lost its color and will need to be replaced.		
8. Composition	100 grams of product contain: Prallethrin(ETOC) T.G. [CAS 23031-36-9] 1,33 g (10 mg/plate) Coformulants, color and cellulosic support a.r at 100 g
